Origins and Core Values of GEA

Establishment Year and Team

GEA was founded in 2012 by Japanese professionals with expertise in Tailor made programming , ERP and IT infrastructure.

Focus on Tailor-made and ERP Services

The company specializes in providing expert Tailor-made and ERP solutions tailored for the Thai market.

Target Market

GEA primarily serves Japanese businesses operating in Thailand, meeting their IT infrastructure needs.

Commitment to Japanese Quality Standards

Adherence to Rigorous Standards

GEA follows strict Japanese quality standards to guarantee product reliability and service excellence.

Focus on Precision

Precision is central to GEA's approach, reflecting meticulous Japanese business practices.

Ensuring Excellence

Commitment to excellence drives continuous improvement in all solutions and services offered by GEA.

Focus on Serving Japanese Organizations in Thailand

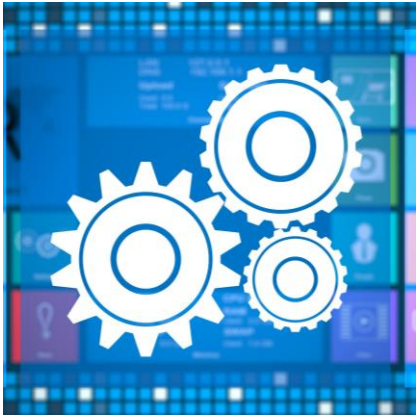

Primary Market Focus

GEA primarily serves Japanese companies operating in Thailand, targeting a specific client group.

Tailored Service Delivery

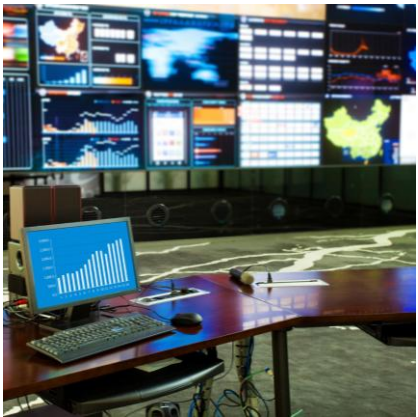

Services are customized to respect Japanese client culture and operational expectations in Thailand.

Service Portfolio and Areas of Expertise

Streamlining Business Processes

ERP systems integrate various business functions to enhance workflow efficiency and reduce operational delays.

Optimizing Factory Planning

Factory planning solutions help optimize production schedules, resource allocation, and inventory management.

Improved Efficiency and Decisions

These solutions provide real-time data to support faster decision-making and improve overall operational efficiency.

Specialized ERP Implementation for Japanese Manufacturing

Customized ERP Solutions

Tailored ERP systems meet the specific operational requirements of Japanese manufacturing companies.

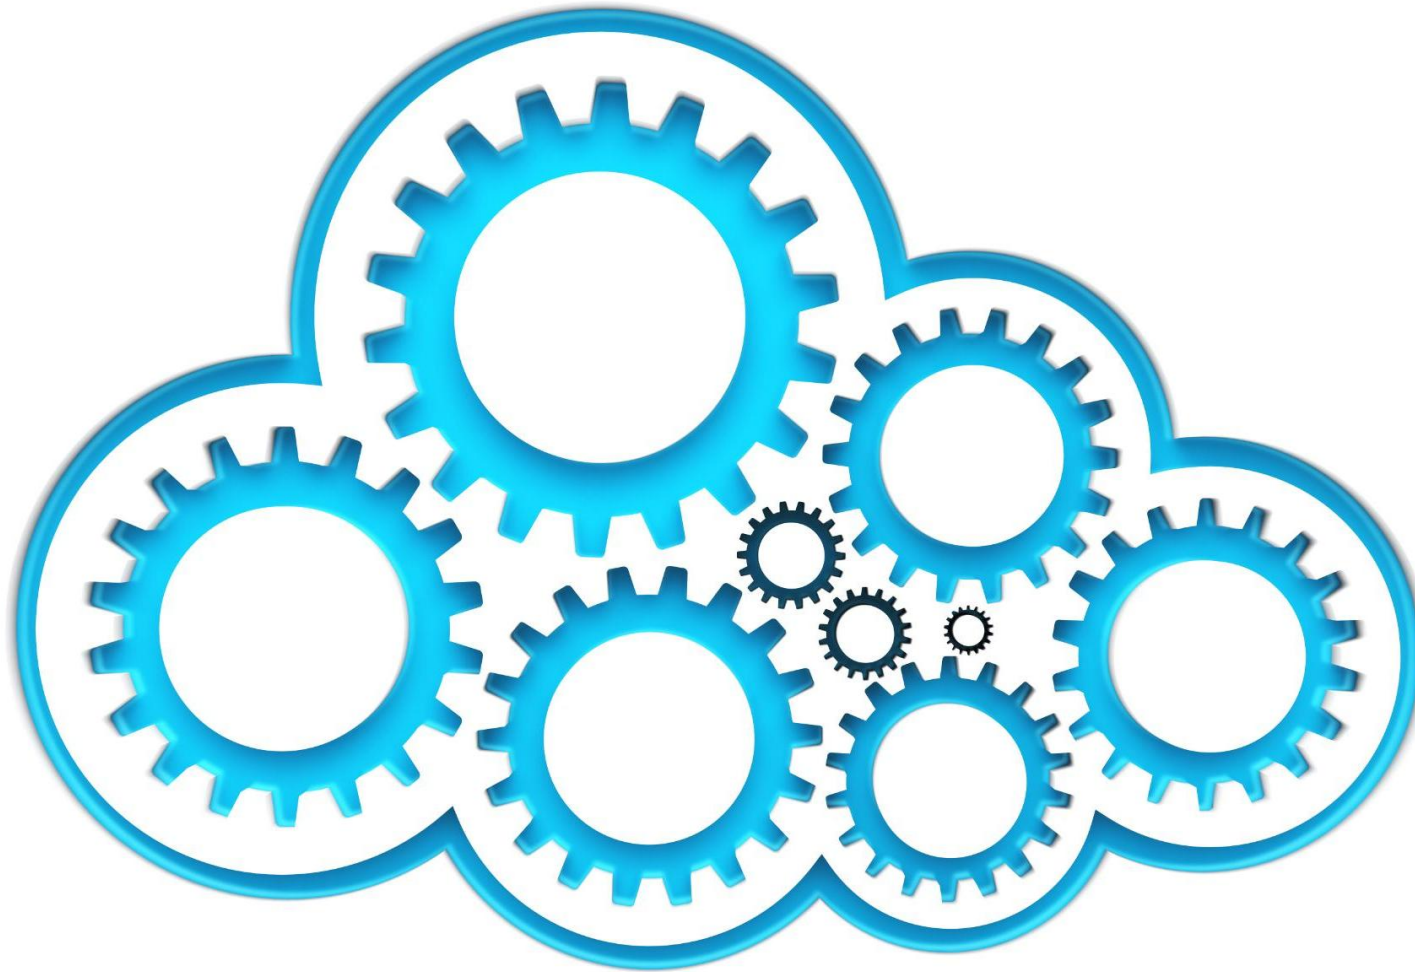

Seamless Integration

ERP implementations ensure smooth integration with existing manufacturing workflows and systems.

Operational Excellence

ERP solutions enhance efficiency and optimize operations in Japanese manufacturing environments.

Custom Software Development and Cloud Solutions

Bespoke Software Solutions

Development of tailor-made software that meets specific client requirements for enhanced business operations.

Cloud-based Services

Provision of cloud computing services to enable flexible and scalable IT infrastructure for clients.

Flexible IT Environments

Solutions designed to adapt dynamically to changing client needs and business growth.

IT Infrastructure and Security Offerings

Comprehensive Infrastructure Services for On-Premise and Cloud

Full Lifecycle Services

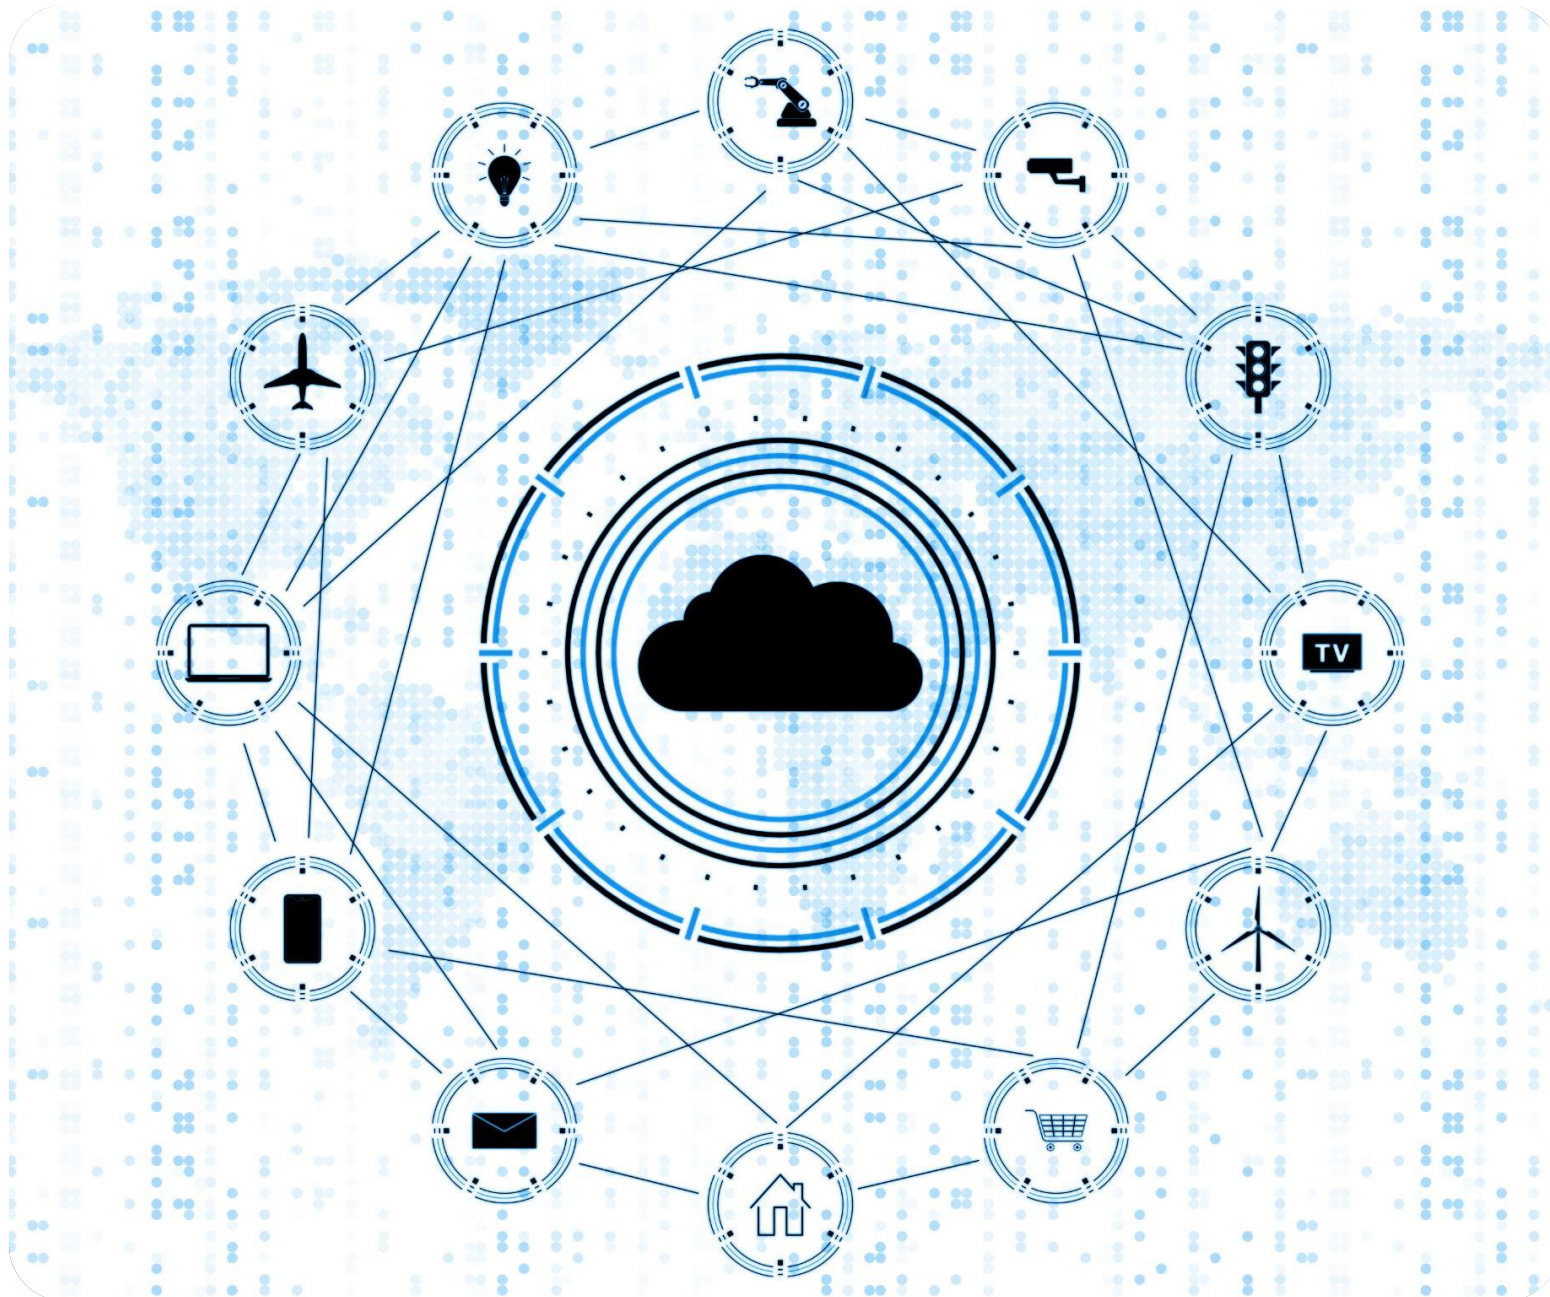

Provides end-to-end infrastructure services covering design, deployment, monitoring, and maintenance.

On-Premise implement

Supports infrastructure services for reliable on-site , and online operations.

Cloud Platform Services

Delivers infrastructure management and monitoring for cloud-based environments.

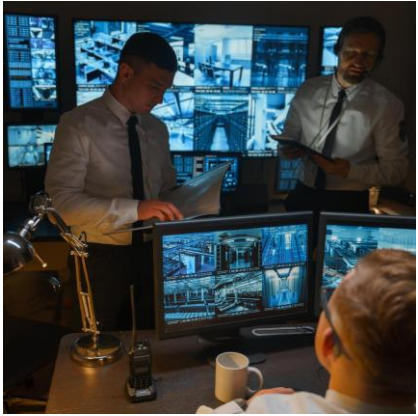

Cloud Platform Expertise: AWS and GCP

Expertise in AWS

GEA has extensive knowledge of AWS services, helping clients optimize cloud infrastructure for scalability and innovation.

Expertise in GCP

GEA leverages Google Cloud Platform's tools to enable clients' agility and drive innovative solutions in the cloud.

Advanced Security Management

GEA employs advanced security management solutions to protect IT environments from evolving threats.

DevSecOps Integration

DevSecOps practices integrate security into development and operations for continuous protection.

Resilient IT Environments

Combining security and DevSecOps ensures resilient and compliant IT systems that withstand attacks.

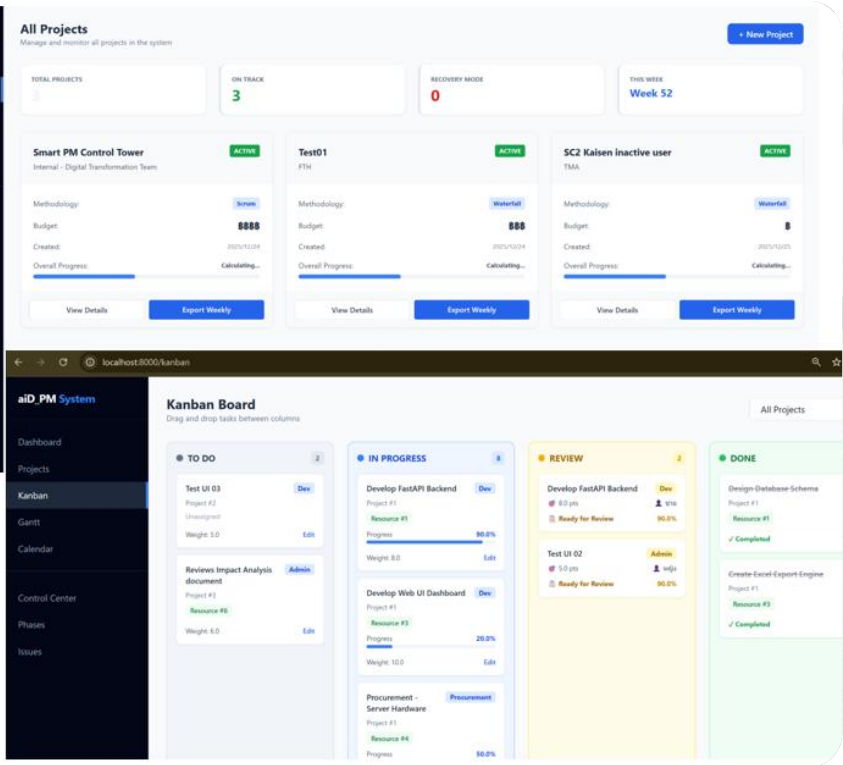

Standard Deliverable Document

Standard Deliverable Document

GEA integrates international standards with Japanese methodologies to deliver professional documentation and high-quality services.

Our approach ensures clarity, fairness, and consistently excellent deliverables for our customers.

Technology Stack and Project Methodologies

Infrastructure & Support Excellence

Robust Multi-Platform Infrastructure

Our team delivers reliable infrastructure solutions across cloud and on-premise environments, including AWS and GCP, tailored for business needs.

Security and Scalability

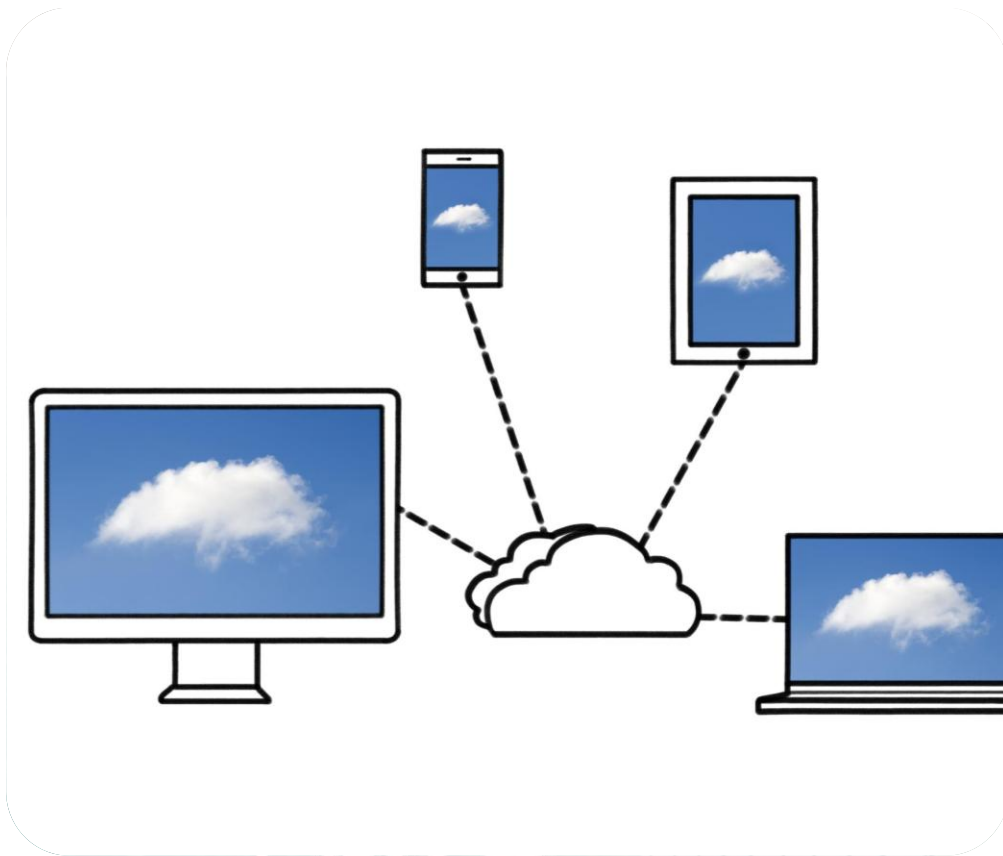

We ensure secure, scalable environments that adapt to business growth, with emphasis on protection and expansion.

Optimized Operations & Support

Our modern approach streamlines operations and delivers proactive, reliable support to ensure continuous business performance.

Cloud Technology Capabilities

Cloud Native Technologies

GEA utilizes cloud native technologies to build efficient and modern IT solutions.

Scalability

Solutions are designed to easily scale and handle growing workloads effectively.

Security

Security is a core focus in deploying cloud solutions to protect data and systems.

High Performance

Cloud solutions deliver high performance to meet demanding business needs.

Waterfall and Agile/Scrum Project Management Approaches

Waterfall Methodology

The waterfall method is a linear project management approach ideal for structured projects with clear requirements.

Agile Scrum Methodology

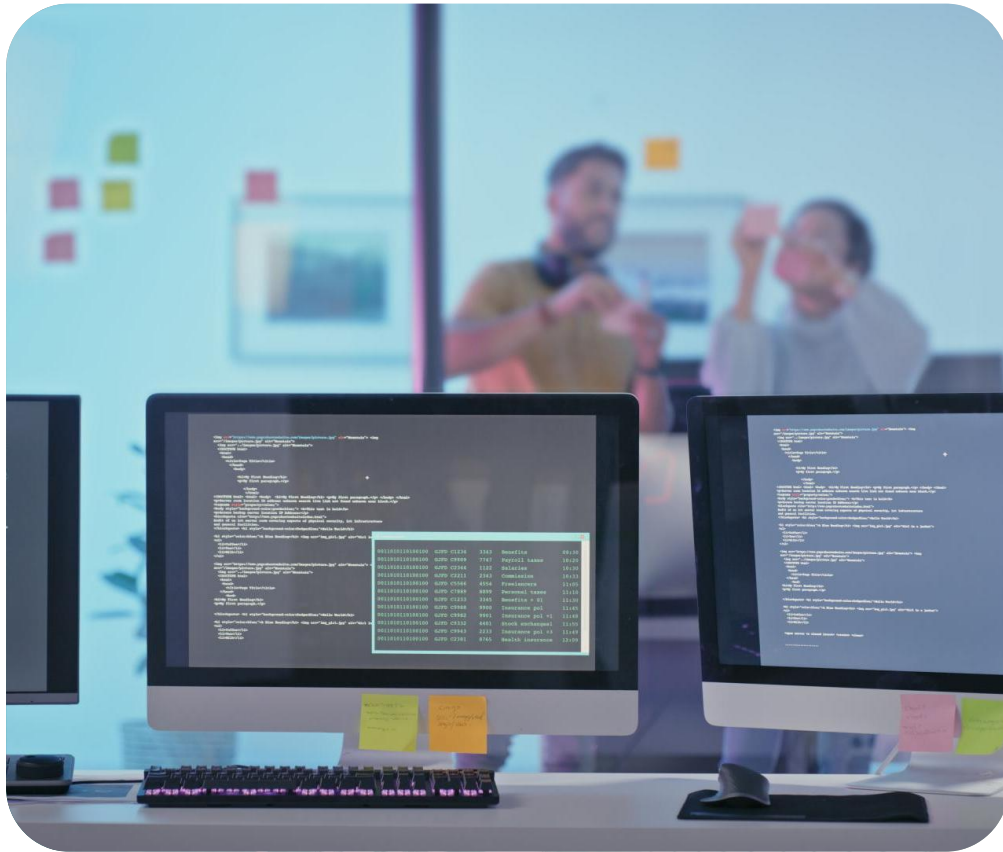

Agile Scrum uses iterative cycles allowing flexible and adaptive development tailored to evolving client needs.

Adaptive Project Management

GEA customizes project management style to match client requirements, balancing structure and flexibility effectively.

Programming Languages , Frameworks & Tools Mastery

Modern Frontend Technologies

Expertise in JavaScript, React, Tailwind CSS, Next and Flutter enables development of engaging, dynamic user interfaces in web application and seamless user experiences.

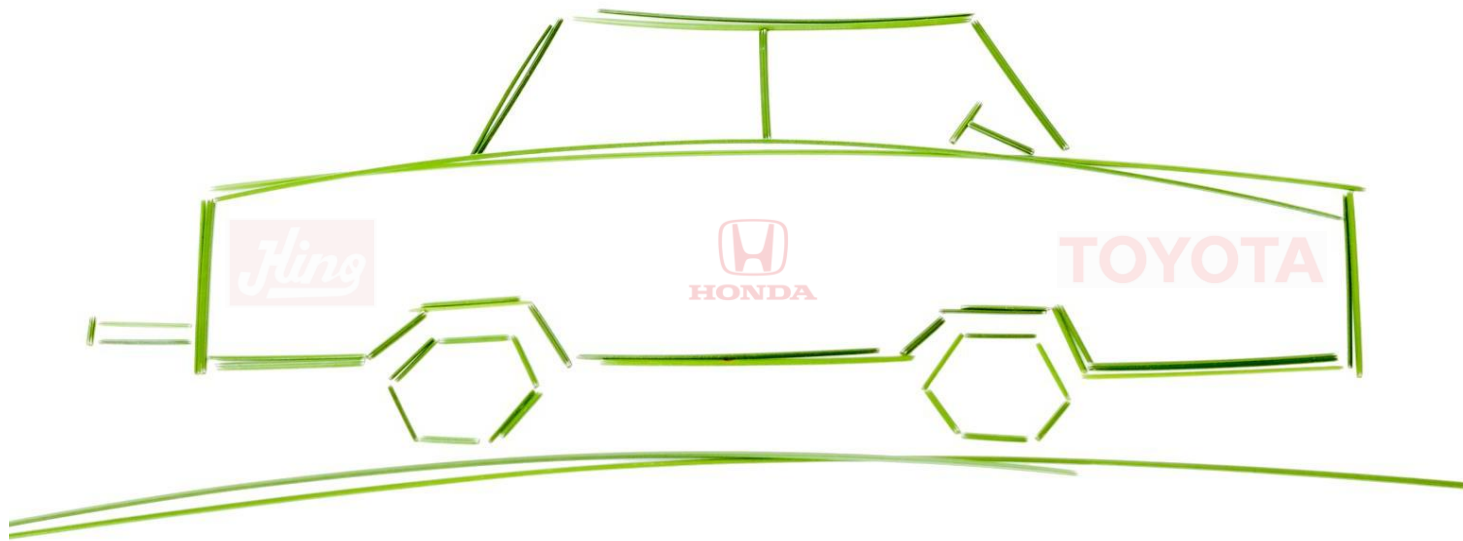

Robust Backend Proficiency

Skilled in Node.js, Java, [Spring Boot, and Struts],C# and .NET to deliver reliable server-side logic and scalable solutions.

Toolset for Efficiency

Mastery of Docker, GitHub, Kubernetes, automation and testing tools supports integrated, efficient development and deployment processes.

Clientele and Industry Impact

Trusted Relationships with Automotive Leaders

Long-standing Partnerships

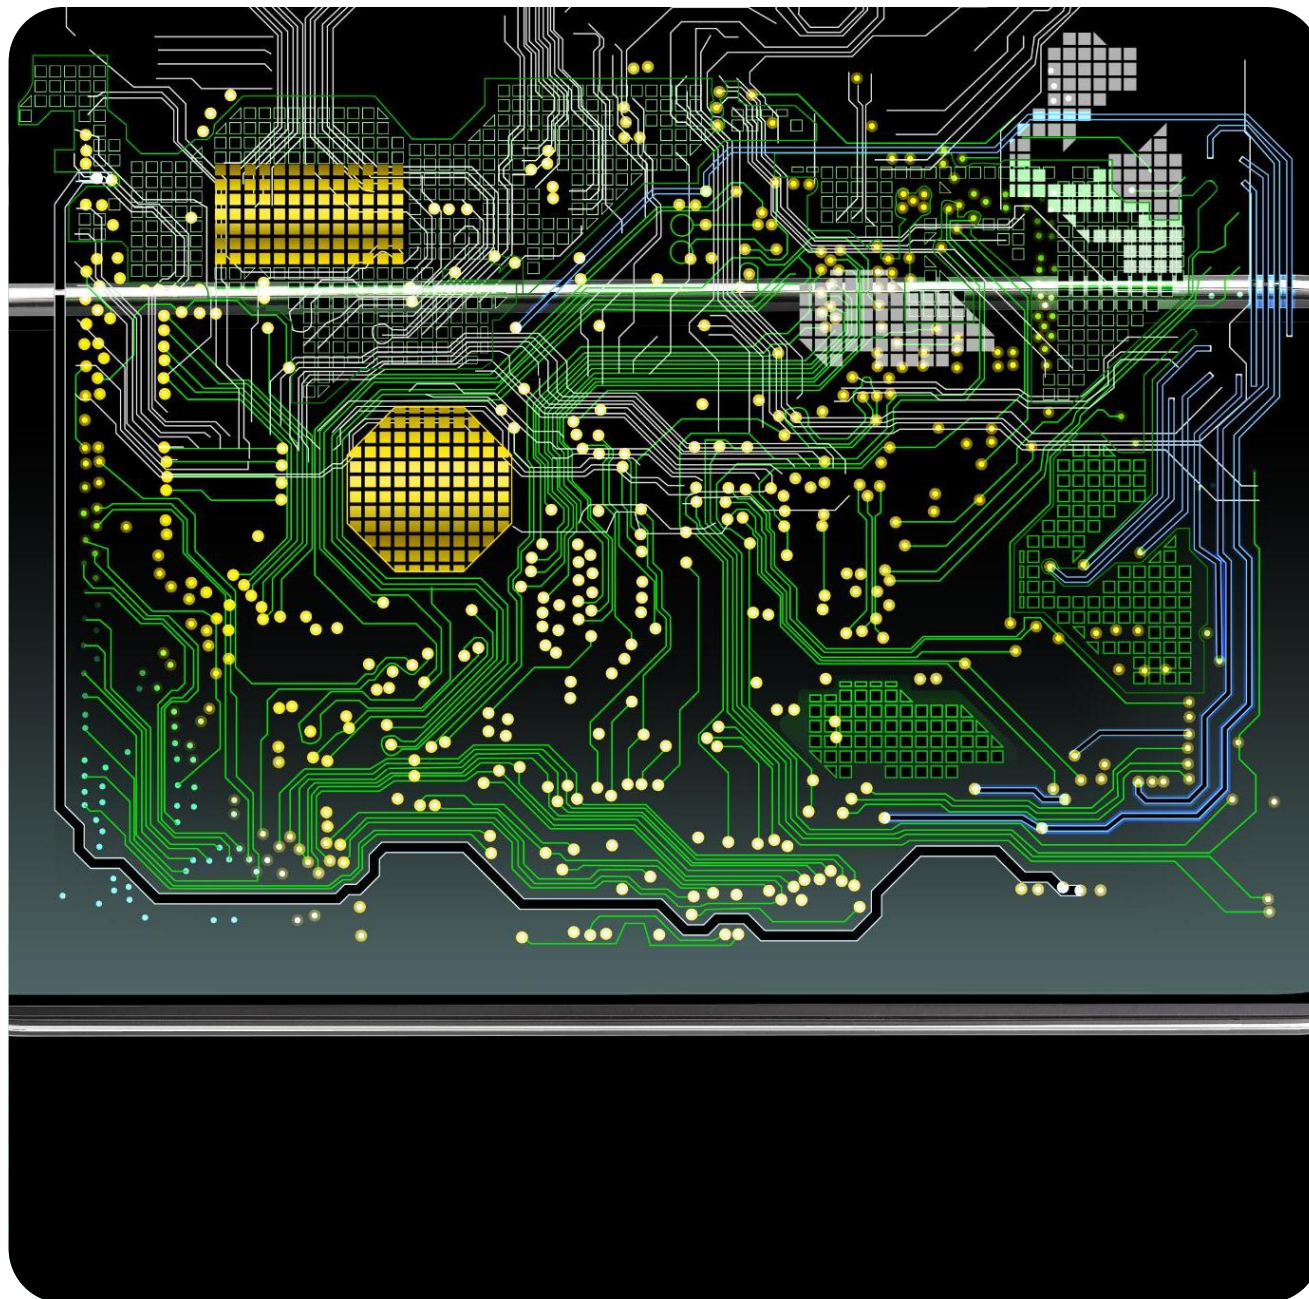

Established strong collaborations with top automotive manufacturers to foster trust and mutual growth.

Tailor-made Solutions Delivery

Providing comprehensive Tailor-made systems to streamline operations and boost automotive business efficiency.

Infrastructure Improvement

Implementing infrastructure solutions to enhance competitiveness in the automotive sector.

Technology and Electronics Sector Expertise

Industry Expertise

GEA has deep experience in technology and electronics sectors, understanding industry-specific challenges.

Tailored IT Solutions

Custom IT solutions are designed to meet unique needs of technology and electronics companies.

ERP Implementation

Effective ERP systems streamline operations and improve efficiency in electronics manufacturing and tech firms.

Other Leading Japanese Industrial Clients

Industrial Steel Sector Service

GEA provides high-quality products and services tailored to the industrial sector's demanding needs.

Diversified Client Base

GEA's versatile approach enables serving clients from various industries with customized solutions.

Commitment to Quality

GEA emphasizes quality assurance to meet industry standards across all client markets.

Vision and Mission

Vision: Empowering Thailand's Digital Future

Driving Digital Transformation

We accelerate Thailand's industries using controllable AI, autonomous testing, and secure data practices for digital growth.

Tailor-Made and ERP Solutions

Advanced Taylor Made and customized ERP systems are integrated to enhance business processes and support unique industry requirements.

Modern IT Infrastructure

Japanese-level expertise delivers robust, modern IT infrastructure, enabling efficiency, innovation, and sustainable business growth.

Our Mission Statement

Tailor-Made IT Solutions

We provide customized ERP and IT services for Japanese factories in Thailand using the latest technologies.

Commitment to Quality

We follow strict Japanese project-management standards to ensure precision, reliability, and timely delivery for our clients.

Long-Term Partnerships

We build sustainable growth through ongoing consultation, collaboration, and strong client relationships.
